

# Fall in Love with SF Tap Water

Bottled vs. Tap

# 85%

of San Francisco tap water comes directly from Sierra snowmelt, one of the highest quality water sources.

SF tap water is tested

# 100,000x

each year, much more often than bottled water.

Bottled water consumes about

# 2000x

 more energy than tap water.

**Bottled water costs 500x more than San Francisco tap water, more than gas or milk per gallon.**

Water is the **healthiest drink**.  
Make the **SMART** Choice.

Everyday, only **5%** of plastic water bottles are recycled, the other **30,000,000** end up in landfills or in the ocean.

**1** plastic water bottle takes **3x** more water to produce.
